

New Scientific Calculators

## New ClassWiz. Boost your curiosity.

As technology changes so do your student's expectations. New ClassWiz provides all the functions and features you trust, and now provides simple and easier navigation, faster processing and great new features.

### Simple and intuitive key layout

The new ClassWiz key layout makes locating menus, functions and values a doddle. Operation and input keys are distinguished by colour and there are fewer keys to simplify access.

### Easy to use device navigation

Home, back, curser and ok buttons make life so simple. Just like any other modern device, new ClassWiz enables easy access to settings, tools and catalog menus as well as shortcuts for page-up and down.

### Better touch rounded keys and grip

Easy-press rounded keys and a textured side-grip make such a difference to everyday calculations. For faster, more precise working, and comfortable handling.

## ClassWiz just got even better

We've kept everything you love and made it better!

Simpler to use and read! Easy to navigate! Nicier to handle!

Free access to ClassWiz emulator software for 7 years!

### Mathbox

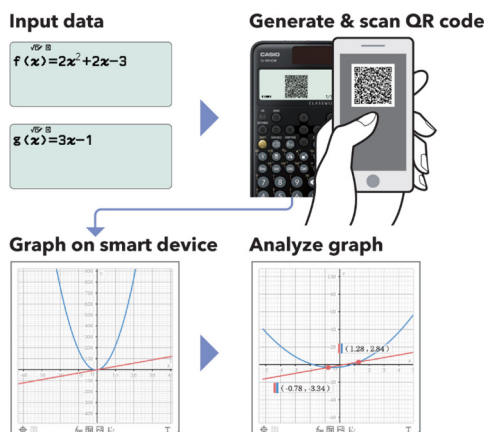

**Math Box**

### Simulation with Mathbox

Students can set the answer they predict, perfect for assisting students' self learning.

### QR-Codes

### Graphs through QR-Code

QR code for input formulas can be generated, scanned and graph can then be displayed on a phone.

### Free software

### Free licence via QR-Code
